SUMMARY

Building AI-powered and data-driven web applications using Python, Django, JavaScript, and machine learning, seeking Software Engineer opportunities.

EDUCATION

Parul University

June 2024 – May 2028

B.Tech CSE (AI & ML) • CGPA: 9.09/10

Relevant Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Machine Learning

Advaith International Academy

2024

CBSE • Percentage: 87.4%

PROJECTS

AI-Based ER Patient Flow Prediction — React, FastAPI, Python, Machine Learning, Tailwind CSS 2026

- Developed an AI-based web application to predict and analyze Emergency Room (ER) patient flow, helping improve patient management and resource planning.
- Integrated machine learning models to forecast patient flow patterns and support data-driven decision-making in emergency departments.
- Implemented an interactive chatbot to assist users with project-related queries and system navigation.
- **Live:** <https://erflow-frontend.onrender.com> • **Code:** <https://github.com/mahikaaaa12/ER-Patient-Flow-Prediction>

TrustGraph — MERN, Python, Machine Learning, Computer Vision, AI/LLMs

2026

- Built an AI-powered digital trust and security platform to analyze documents, images, websites, text authenticity, and transaction risks.
- Implemented multiple security modules including document analysis, image forensics, phishing/website inspection, abuse-ring detection, and risk simulation.
- Developed a full-stack web application with secure authentication, REST APIs, MongoDB-based data management, and forensic audit reporting.
- Integrated AI/ML and computer vision techniques to generate explainable risk assessments and security insights.
- **Live:** <https://trustgraph-client.onrender.com> • **Code:** <https://github.com/mahikaaaa12/TrustGraph>

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL

Frontend: HTML, CSS, React.js, Tailwind CSS

Backend: Django, Flask, FastAPI

AI/ML: Scikit-learn, Pandas, NumPy, LangChain, RAG, LSTM

Databases: MySQL, SQLite, MongoDB

Developer Tools: Git, GitHub, VS Code, Postman, Jupyter Notebook

APIs & Automation: REST APIs, n8n

ACHIEVEMENTS

- Cleared final round of Viksit Bharat Hackathon
- Cleared phase 1 and 2 of the Guidewire DevTrails Hackathon
- Cleared Round 1 in the Smart India Hackathon

CERTIFICATIONS

- HTML & CSS Certification — Pearson (Feb 2025) [link]
- JavaScript Certification — Pearson (Apr 2025) [link]
- Python Certification - IBM (July 2025) [link]
- AWS Data Engineering Certification - AWS Academy (March 2026) [link]
- Building RAG Agents with LLM - NVIDIA (August 2026) [link]
