SUMMARY

Computer Science student specializing in **AI & ML** with skills in **Python, Java, and Web Development**. Built academic and personal projects focused on **Problem Solving** and **UI Development**. Interested in **Software Development** and **Intelligent Systems**, with a strong willingness to learn and contribute.

TECHNICAL SKILLS

B.Tech in Computer Science (AI & ML) GPA: 9.82

Parul Institute of Engineering and Technology 2024 – Present

Higher Secondary (Class XII) Percentage: 87.4%

Advaith International Academy 2024

Secondary (Class X) Percentage: 93%

Vidhya Vruddhi High School 2022

TECHNICAL SKILLS

Languages: Python, Java, C, C++

Web: HTML, CSS, JavaScript, Three.js

AI & Data: NumPy, Pandas, Scikit-learn, Generative AI

Core CS: Data Structures, Algorithms, OOPS, Generative AI

Tools & Platforms: Git, GitHub, VS Code, SQL

Frameworks: Django, FastAPI

ACADEMIC PROJECTS

Vogue Vista – Body Shape & Colour Palette Analysis

- Developed a fashion assistant web application that analyzes user body shape to provide personalized outfit recommendations.
- Implemented color palette analysis to suggest suitable clothing colors based on styling principles.

Creative Agency Website

- Designed and developed a multi-section responsive website for a creative agency concept using modern front-end technologies.
- Implemented smooth navigation features including interactive menus, clear call-to-action elements, and intuitive page flow.
- Focused on modern UI styling with consistent color themes, typography, and spacing for better visual hierarchy.

HACKATHON

Smart India Hackathon, :

- Worked in a team to create a Medical application that allows rural people or people with little experience with technology, access medical facilities easily.

Guidewire DEVTrails University Hackathon, :

- Developed an AI-based web platform named GigShield that predicts income loss for gig workers and enables quick micro-insurance coverage with real-time risk assessment and simplified claim support.
